

SunTech Vet BP

Product Comparison

SUNTECH

Utilizing an animal-specific blood pressure (BP) algorithm with our motion-tolerant technology, SunTech is dedicated to providing you with the most advanced solutions for reliably and accurately assessing animal BP and vital signs – an important advancement for pets and vets!

Our product line allows you to choose the patient monitoring vital signs solution that works for your veterinary practice. Whether you need BP for wellness check-ups or a multiparameter monitor during procedures, we have the solution for you.

The Vet20 is designed for spot checks and annual wellness exams. The Vet25 is designed to be flexible—for measuring BP in either the exam room or the operating room. The Vet30 combines our trusted BP technology with oxygen saturation and temperature monitoring for animals pre-, post-, or during a procedure. The Vet40 adds ECG and EtCO₂ monitoring for increased capabilities during, before, and after a procedure. For full portability, the Vet25, Vet30, and Vet40 feature rechargeable batteries.

SunTech Monitoring Solutions

From advanced monitoring to spot-check BP

Vet40 & Vet40E

Multiparameter Monitor for Animals

The portable and rechargeable SunTech® Vet40™ monitor delivers comprehensive multiparameter monitoring for companion animals throughout the hospital, supporting patient care before, during, and after procedures. In addition to blood pressure monitoring using SunTech's trusted Advantage™ VET BP technology, the Vet40 provides ECG, oxygen saturation (SpO₂), temperature, and integrated EtCO₂ with continuous waveform display for enhanced clinical insight. Blood pressure trending and real-time waveforms support ongoing assessment as patients move between care areas. The intuitive touchscreen interface allows for easy review, analysis, and export of patient data. The Vet40 is also available as the Vet40E, which includes an equine-specific blood pressure mode in addition to companion animal modes.

Vet30 & Vet30E

Continuous Vital Signs Monitor for Animals

The portable and rechargeable SunTech® Vet30™ monitor expands patient monitoring beyond blood pressure to include oxygen saturation (SpO₂), and temperature for companion animals pre- and post-procedure. Intervals can be set to automatically take BP readings during a monitoring period. Utilizing SunTech's trusted Advantage™ VET BP technology, the SunTech Vet30 quietly performs motion-tolerant BP measurements while providing continuous SpO₂ and temperature monitoring. The intuitive, touch screen interface provides users all the necessary tools for reviewing, analyzing, and export of vital signs data. The Vet30 is also available as the Vet30E, which comes with an equine-specific blood pressure mode in addition to companion animal modes.

Vet25 & Vet25E

Spot-Check and Continuous BP Monitor for Animals

The portable and rechargeable SunTech® Vet25™ monitor provides reliable blood pressure (BP) measurements for wellness exams, spot-checks, and monitoring companion animals throughout the hospital. It is the ideal monitor for veterinary teams wanting to increase their BP monitoring. Intervals can be set to automatically take BP readings during a monitoring period. Utilizing SunTech's trusted Advantage™ VET BP technology, the Vet25 quietly performs motion-tolerant BP measurements, delivering accurate results. The intuitive, touchscreen interface provides essential tools for reviewing, analyzing, and export of BP data. The Vet25 is also available as the Vet25E, which includes an equine-specific blood pressure mode in addition to companion animal modes.

Vet20

Spot-Check Blood Pressure Monitor for Companion Animals

The portable SunTech® Vet20™ quickly and easily provides reliable blood pressure (BP) measurements on awake companion animals, ensuring a simpler assessment process for veterinarians and their staff members. Utilizing SunTech's trusted Advantage™ VET BP technology, the Vet20 quietly performs motion-tolerant, oscillometric BP measurements, delivering accurate results. The intuitive touch screen interface includes all of the necessary features for reviewing and analyzing BP data. Alarms can be silenced to avoid frightening the animal and saved measurement data is always retained when the device is powered off.
